LAB³'S
SECURITY INSIGHT

AI-enabled threat detection and response

Elevate your cyber security posture and be fully operational within weeks.

Microsoft Solutions Partner

5x Microsoft Solution Partner

6x Microsoft Advanced Specialisations

200+ certified Azure specialists

Microsoft Intelligent Security Association member

Security Insight extends the capabilities of Microsoft Sentinel with augmented threat intelligence, automated threat response, and democratised security operations.

Empower your IT team with pre-built event management dashboards, automated SecOps workflows, and AI discernment that cuts out the noise.

Used by both in-house security teams and global Security Operations Centres, Security Insight enables world-class cyber security that's practical to manage.

- Heightened protection
- Automated response
- Efficient security operations
- Accelerated deployment

INFORMATION SECURITY MANAGEMENT SYSTEM

GET SECURE. STAY SECURE.

DEPLOY UNCOMPROMISING CYBER SECURITY THAT'S PRACTICAL TO MANAGE.

Security Insight is Microsoft Sentinel deployed as code, with augmentations that include pre-built threat definitions, advanced analytics, anomaly detection, and intuitive event management dashboards.

Security Insight leverages LAB3's own SOC-grade threat intelligence service, which amalgamates 40+ sources of cyber intelligence in real time.

AI-enabled analytics provides context to security alerts, filtering out the noise enabling faster and more effective human response to security events.

- Prebuilt SOAR playbooks
- Real-time threat intelligence
- Intuitive SecOps dashboards
- Log ingestion cost optimization

World class cyber security, without the management overhead.

SIEM and SOAR capabilities underpinned by Microsoft Sentinel

Aligned to national and global security standards, including IRAP and ISO 27001

Enables SecOps automation and cyber security democratisation

Design in weeks, deploy in minutes.
Maintain confidence in real time.
